London, EC1R 0NE  
United Kingdom

Re: Response to Investor CDP 2015 Information Request

Dear Mr. Dickinson:

Big Lots, Inc. (together with its subsidiaries referred to collectively herein as “we,” “us,” and “our”) is a unique, non-traditional, discount retailer in the United States. As of the end of our second quarter of fiscal 2015, we operated 1,464 stores in 47 states. Our responses to the CDP 2015 Information Request are exclusively for our continuing operations. More information about Big Lots is available on our website located at [www.biglots.com](http://www.biglots.com).

We are providing responses to questions posed by the Investor CDP 2015 Information Request on a voluntary basis. Our responses are provided based on the information we have available – which we do not believe encompasses all sources of our GHG emissions and does not allow us to respond to each question posed by the request. We have indicated “no response,” “not applicable,” “unknown” or omitted questions when we have no response. We make no representations or warranties as to the accuracy or completeness of the information we have provided in response to the request, and we do not undertake any obligation to update our response to or omission of any question.

Please note that only this letter, in its entirety, shall be considered our official response to the Investor CDP 2015 Information Request. Any alteration, abstraction or abbreviation of our complete response shall not be considered our official response and the same is not endorsed by us and may not represent our views.

Any forward-looking statements we make in response to the request involve risks and uncertainties and are subject to the safe harbor provisions as stated in our filings with the U.S. Securities and Exchange Commission. Actual results may differ materially from those described in our forward-looking statements.

Thank you for your interest in Big Lots and allowing us to contribute to the Carbon Disclosure Project. We appreciate the opportunity to share with you the important steps we have taken to mitigate the impact of our operations on the environment, while seeking to grow and improve our financial outlook.

Sincerely,

Big Lots, Inc.

## CC0.2

### Reporting Year

Please state the start and end date of the year for which you are reporting data.

The current reporting year is the latest/most recent 12-month period for which data is reported. Enter the dates of this year first.

We request data for more than one reporting period for some emission accounting questions. Please provide data for the three years prior to the current reporting year if you have not provided this information before, or if this is the first time you have answered a CDP information request. (This does not apply if you have been offered and selected the option of answering the shorter questionnaire). If you are going to provide additional years of data, please give the dates of those reporting periods here. Work backwards from the most recent reporting year.

Please enter dates in following format: day(DD)/month(MM)/year(YYYY) (i.e. 31/01/2001).

Enter Periods that will be disclosed
Sun 02 Feb 2014 - Sun 01 Feb 2015

## CC0.3

### Country list configuration

Please select the countries for which you will be supplying data. If you are responding to the Electric Utilities module, this selection will be carried forward to assist you in completing your response.

Select country
United States of America

## CC0.4

### Currency selection

Please select the currency in which you would like to submit your response. All financial information contained in the response should be in this currency.

USD(\$)

## CC0.6

### Modules

As part of the request for information on behalf of investors, electric utilities, companies with electric utility activities or assets, companies in the automobile or auto component manufacture sub-industries, companies in the oil and gas sub-industries, companies in the information technology and telecommunications sectors and companies in the food, beverage and tobacco industry group should complete supplementary questions in addition to the main questionnaire. If you are in these sector groupings (according to the Global Industry Classification Standard (GICS)), the corresponding sector modules will not appear below but will automatically appear in the navigation bar when you save this page. If you want to query your classification, please email [respond@cdp.net](mailto:respond@cdp.net).

If you have not been presented with a sector module that you consider would be appropriate for your company to answer, please select the module below. If you wish to view the questions first, please see <https://www.cdp.net/en-US/Programmes/Pages/More-questionnaires.aspx>.

## Further Information

### *Module: Management*

#### Page: CC1. Governance

#### CC1.1

**Where is the highest level of direct responsibility for climate change within your organization?**

Board or individual/sub-set of the Board or other committee appointed by the Board

#### CC1.1a

**Please identify the position of the individual or name of the committee with this responsibility**

Our Public Policy and Environmental Affairs Committee ("PPEAC") was formed in 2008 for the purpose of taking a leadership role in shaping our policies and practices as they relate to current and emerging public policy, environmental and social issues that may impact us. The PPEAC is a management committee that reports to the Nominating / Corporate Governance Committee of our Board of Directors

#### CC1.2

**Do you provide incentives for the management of climate change issues, including the attainment of targets?**

No

#### CC1.2a

Please provide further details on the incentives provided for the management of climate change issues

Who is entitled to benefit from these incentives?	The type of incentives	Incentivized performance indicator	Comment

## Further Information

#### Page: CC2. Strategy

#### CC2.1

**Please select the option that best describes your risk management procedures with regard to climate change risks and opportunities**

Integrated into multi-disciplinary company wide risk management processes

### CC2.1a

**Please provide further details on your risk management procedures with regard to climate change risks and opportunities**

Frequency of monitoring	To whom are results reported?	Geographical areas considered	How far into the future are risks considered?	Comment
Annually	Board or individual/sub-set of the Board or committee appointed by the Board			

### CC2.1b

**Please describe how your risk and opportunity identification processes are applied at both company and asset level**

The PPEAC oversees management of risks associated with public policy, environmental and social matters that may affect our operations, performance or public image. Individual departments within our company may identify risk and opportunities from climate change and, if significant risks or opportunities exist which may affect our business, raise such matters to the PPEAC and/or management for further analysis

### CC2.1c

**How do you prioritize the risks and opportunities identified?**

Individual departments within our company may identify risk and opportunities from climate change and, if significant risks or opportunities exist which may affect our business, raise such matters to the PPEAC and/or management for further analysis.

### CC2.1d

**Please explain why you do not have a process in place for assessing and managing risks and opportunities from climate change, and whether you plan to introduce such a process in future**

Main reason for not having a process	Do you plan to introduce a process?	Comment

### CC2.2

**Is climate change integrated into your business strategy?**

Yes

## CC2.2a

**Please describe the process of how climate change is integrated into your business strategy and any outcomes of this process**

The PPEAC oversees management of risks associated with public policy, environmental and social matters that may affect our operations, performance or public image. Individual departments within our company may identify risk and opportunities from climate change and, if significant risks or opportunities exist which may affect our business, raise such matters to the PPEAC and/or management for further analysis. Among the responsibilities of the PPEAC are the duties to: (a) identify and review current and emerging environmental issues relating to emissions, greenhouse gases, climate change, energy consumption and conservation programs; (b) review and assess our policies, practices, performance and compliance with respect to those environmental issues, as well as the impact such issues had on us; (c) discuss our strategies for addressing the future impact of those environmental issues on our operations and performance; (d) report its activities, findings and recommendations to our Board of Directors; and (e) report to management such matters within the PPEAC's purview that it believes have, or are reasonably likely to have, a material effect on our operations or financial statements or would otherwise be required to be publicly disclosed by us under applicable laws, rules or regulations.

## CC2.2b

**Please explain why climate change is not integrated into your business strategy**

## CC2.2c

**Does your company use an internal price of carbon?**

No, and we currently don't anticipate doing so in the next 2 years

## CC2.2d

**Please provide details and examples of how your company uses an internal price of carbon**

## CC2.3

**Do you engage in activities that could either directly or indirectly influence public policy on climate change through any of the following? (tick all that apply)**

No

## CC2.3a

**On what issues have you been engaging directly with policy makers?**

Focus of legislation	Corporate Position	Details of engagement	Proposed legislative solution
----------------------	--------------------	-----------------------	-------------------------------

**CC2.3b**

Are you on the Board of any trade associations or provide funding beyond membership?

**CC2.3c**

Please enter the details of those trade associations that are likely to take a position on climate change legislation

Trade association	Is your position on climate change consistent with theirs?	Please explain the trade association's position	How have you, or are you attempting to, influence the position?
-------------------	--	---	---

**CC2.3d**

Do you publicly disclose a list of all the research organizations that you fund?

**CC2.3e**

Do you fund any research organizations to produce or disseminate public work on climate change?

**CC2.3f**

Please describe the work and how it aligns with your own strategy on climate change

**CC2.3g**

Please provide details of the other engagement activities that you undertake

**CC2.3h**

What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?

**CC2.3i**

Please explain why you do not engage with policy makers

**CC2.4**

Would your organization's board of directors support an international agreement between governments on climate change, which seeks to limit global temperature rise to under two degree Celsius from pre-industrial levels in line with IPCC scenarios such as RCP2.6?

No opinion

**CC2.4a**

Please describe your board's position on what an effective agreement would mean for your organization and activities that you are undertaking to help deliver this agreement at the 2015 United Nations Climate Change Conference in Paris (COP 21)

**Further Information**

**Page: CC3. Targets and Initiatives**

**CC3.1**

Did you have an emissions reduction target that was active (ongoing or reached completion) in the reporting year?

No

**CC3.1a**

Please provide details of your absolute target

ID	Scope	% of emissions in scope	% reduction from base year	Base year	Base year emissions (metric tonnes CO2e)	Target year	Comment

**CC3.1b**

Please provide details of your intensity target

ID	Scope	% of emissions in scope	% reduction from base year	Metric	Base year	Normalized base year emissions	Target year	Comment

**CC3.1c**

Please also indicate what change in absolute emissions this intensity target reflects

ID	Direction of change anticipated in absolute Scope 1+2 emissions at target completion?	% change anticipated in absolute Scope 1+2 emissions	Direction of change anticipated in absolute Scope 3 emissions at target completion?	% change anticipated in absolute Scope 3 emissions	Comment
----	---	--	---	--	---------

**CC3.1d**

For all of your targets, please provide details on the progress made in the reporting year

ID	% complete (time)	% complete (emissions)	Comment
----	-------------------	------------------------	---------

**CC3.1e**

Please explain (i) why you do not have a target; and (ii) forecast how your emissions will change over the next five years

**CC3.2**

Does the use of your goods and/or services directly enable GHG emissions to be avoided by a third party?

No

**CC3.2a**

Please provide details of how the use of your goods and/or services directly enable GHG emissions to be avoided by a third party

**CC3.3**

Did you have emissions reduction initiatives that were active within the reporting year (this can include those in the planning and/or implementation phases)

**CC3.3a**

Please identify the total number of projects at each stage of development, and for those in the implementation stages, the estimated CO2e savings

Stage of development	Number of projects	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
----------------------	--------------------	--

### CC3.3b

For those initiatives implemented in the reporting year, please provide details in the table below

Activity type	Description of activity	Estimated annual CO2e savings (metric tonnes CO2e)	Scope	Voluntary/ Mandatory	Annual monetary savings (unit currency - as specified in CC0.4)	Investment required (unit currency - as specified in CC0.4)	Payback period	Estimated lifetime of the initiative	Comment

### CC3.3c

What methods do you use to drive investment in emissions reduction activities?

Method	Comment

### CC3.3d

If you do not have any emissions reduction initiatives, please explain why not

Have you identified any inherent climate change risks that have the potential to generate a substantive change in your business operations, revenue or expenditure? Tick all that apply

#### CC5.1a

Please describe your inherent risks that are driven by changes in regulation

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management

#### CC5.1b

Please describe your inherent risks that are driven by change in physical climate parameters

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management

#### CC5.1c

Please describe your inherent risks that are driven by changes in other climate-related developments

Risk driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management

#### CC5.1d

Please explain why you do not consider your company to be exposed to inherent risks driven by changes in regulation that have the potential to generate a substantive change in your business operations, revenue or expenditure

We are not currently subject to GHG regulations or emissions caps in the U.S. As a corporation that is primarily an indirect emitter of GHG emissions, it is unlikely that we will be materially affected directly by climate change legislation that is proposed or pending at this time; however, we cannot predict the likelihood or impact of future regulations. Our strategy is to focus on energy efficiency as a means to reduce GHG emissions.

The potential business implications of climate change regulations include increased costs for fossil-based electricity and fuels. We may incur increased product and operational costs as a result of legislation that targets utility companies. If electric utility cap and trade legislation is passed, utility companies may be forced to pass along to their customers the increased costs required in order for them to comply with the requirements of these bills. Also, regulations governing disclosure of the carbon footprint of operations and goods will require an investment in human resource time as well as product tracking databases.

The regulations that emerge to address potential climate change may also impact our supply chain and customers. For example, passage of fuel-related legislation could potentially increase transportation costs for us as our distribution and transportation providers may incur increased expenses in order to comply with such legislation. Consequently, we may incur increased costs to acquire and sell the goods offered in our stores.

As raw material costs increase, so too would our cost of goods sold, which reduces margin and/or forces us to increase prices, which creates increased price sensitivity. As customers pay more for their energy needs, they would likely reduce expenditures in other areas, particularly non-core expenditures, and this may hurt us and many other corporations. We have not attempted to quantify the financial implications of climate change risks or existing or upcoming regulations.

## CC5.1e

**Please explain why you do not consider your company to be exposed to inherent risks driven by physical climate parameters that have the potential to generate a substantive change in your business operations, revenue or expenditure**

Climate change presents us with some physical risks and challenges that may result from extreme weather events. Extreme weather events could increase the risk of damage to real and personal property, business interruption, and increased energy and insurance costs. For example, an increase in average temperatures would likely result in increased costs to control the temperatures in our retail stores, home office and distribution centers.

Increases in the frequency and intensity of severe weather events (particularly hurricanes, tornadoes and flooding events) could potentially result in business interruption, the destruction of buildings and the loss of merchandise. Hurricanes will likely pose the greatest risk to our retail stores in coastal states, but it is possible that storms of greater severity and flooding may also affect other operations across the country.

Additionally, severe weather events could affect our supply chain. Hurricanes in areas of heavy oil production can disrupt oil supplies, reduce production and cause oil prices to increase dramatically. This is a cost that would most likely be passed to us by our distribution and transportation providers. Damage to infrastructure such as interstates and bridges could also potentially disrupt delivery of goods to impacted regions.

Another aspect of potential climate change which poses possible physical risks to us is the rise of global sea level caused by the melting polar icecaps. Rising sea level could result in the increased flooding of retail stores in coastal areas as the result of storm surges which will reach farther inland than they did previously. If sea level rise and associated flooding related to climate change becomes a reality, the proximity of many of our stores to coastal areas may affect our ability to operate efficiently and result in operational costs.

## CC5.1f

**Please explain why you do not consider your company to be exposed to inherent risks driven by changes in other climate-related developments that have the potential to generate a substantive change in your business operations, revenue or expenditure**

An actual change in climate could adversely impact us by: (a) producing higher energy costs at our facilities and for our logistics; (b) increasing our operational expenses (to track and manage climate change issues); and (c) requiring incremental capital investment. Our objective is to be aware of the implications of our energy decisions and to be a responsible energy consumer in running our business.

Our environmental strategy has been to focus on reducing our indirect GHG emissions through waste reduction and recycling, reducing our energy consumption through energy efficiency projects and through reducing the consumption of fossil fuels by improving our transportation methods. We have launched several initiatives in recent years to mitigate the impact of our operations on the environment.

We assess the effects of potential climate change risks on a case-by-case basis. We generally do not publicly disclose our assessments or the potential impact such risks may have on our financial condition or operating results, unless required to do so by applicable laws or regulations.

Projects we undertake to mitigate potential climate change risks are weighted based various factors, including return on investment. Generally, we conduct pilot programs to measure the impact of the project, with adjustments being made as deemed necessary. Upon completion of the pilot, we will consider a more comprehensive rollout, making changes to the project scope or discontinuing the project. We also track the actual cost of projects and expense item against budgeted amounts to ensure we appropriately account for such liabilities. Through that process, lessons learned are evaluated and prioritized for future opportunities.

We recognize that climate change may have a future impact on our environment and economy. Presently, however, it is not anticipated that climate change will cause a significant shift in consumer attitudes such that a material risk will be created for us. We believe it is more likely that any shift in consumer attitudes will be around environmental concerns such as recycling, energy conservation, packaging reduction, natural/organic goods and increased online shopping due to increases in fuel costs. We are constantly evaluating these potential risks and the opportunities that may be incorporated in our business strategies.

**Have you identified any inherent climate change opportunities that have the potential to generate a substantive change in your business operations, revenue or expenditure? Tick all that apply**

#### CC6.1a

Please describe your inherent opportunities that are driven by changes in regulation

Opportunity driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management

**CC6.1b**

Please describe the inherent opportunities that are driven by changes in physical climate parameters

Opportunity driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management

**CC6.1c**

Please describe the inherent opportunities that are driven by changes in other climate-related developments

Opportunity driver	Description	Potential impact	Timeframe	Direct/ Indirect	Likelihood	Magnitude of impact	Estimated financial implications	Management method	Cost of management

**CC6.1d**

**Please explain why you do not consider your company to be exposed to inherent opportunities driven by changes in regulation that have the potential to generate a substantive change in your business operations, revenue or expenditure**

As a retailer, we do not expect to realize significant increases in business opportunities as a result of regulatory requirements related to climate change issues. We have chosen to focus on reducing our carbon footprint by reducing and preventing waste, reducing our energy consumption, and improving the efficiency of our distribution and transportation processes. By incorporating these strategies into our operations, we hope to reduce our impact on the environment while growing and improving our financial outlook.

**CC6.1e**

**Please explain why you do not consider your company to be exposed to inherent opportunities driven by physical climate parameters that have the potential to generate a substantive change in your business operations, revenue or expenditure**

We do not expect to realize significant increases in business opportunities as a result of potential physical changes resulting from climate change. However, stores in areas impacted by hurricanes may experience an increase in sales of certain goods before and after hurricanes, including flashlights, water, hygiene products and batteries. Additionally, if we began to experience longer growing seasons, we may have an opportunity to sell more lawn and garden goods. Of course, such a change may also result in a corresponding decline in sales of goods generally purchased during periods of cold weather (e.g., snow shovels, winter supplies, etc.).

The potential financial effects of opportunities are assessed in much the same way we assess potential climate change risks – on a case-by-case basis.

### CC6.1f

**CC14.2**

Please indicate the verification/assurance status that applies to your reported Scope 3 emissions

**CC14.2a**

Please provide further details of the verification/assurance undertaken, and attach the relevant statements

Type of verification or assurance	Attach the statement	Page/Section reference	Relevant standard	Proportion of Scope 3 emissions verified (%)

**CC14.3**

Are you able to compare your Scope 3 emissions for the reporting year with those for the previous year for any sources?

No, we don't have any emissions data

**CC14.3a**

Please identify the reasons for any change in your Scope 3 emissions and for each of them specify how your emissions compare to the previous year

Sources of Scope 3 emissions	Reason for change	Emissions value (percentage)	Direction of change	Comment

**CC14.4**

Do you engage with any of the elements of your value chain on GHG emissions and climate change strategies? (Tick all that apply)

**CC14.4a**

Please give details of methods of engagement, your strategy for prioritizing engagements and measures of success

### CC14.4b

To give a sense of scale of this engagement, please give the number of suppliers with whom you are engaging and the proportion of your total spend that they represent

Number of suppliers	% of total spend	Comment
---------------------	------------------	---------

### CC14.4c

If you have data on your suppliers' GHG emissions and climate change strategies, please explain how you make use of that data

How you make use of the data	Please give details
------------------------------	---------------------

### CC14.4d

Please explain why you do not engage with any elements of your value chain on GHG emissions and climate change strategies, and any plans you have to develop an engagement strategy in the future
