Single Chair Part List

1 set of instructions

2 chair legs
1 crossmember

Chair Back

4 short bolts

16 washers

8 lock nuts

4 long bolts

2 end caps

Chair Seat

4 plastic spacers

Step 1.

Assemble Chair Seat and Back by placing **washer** on **short bolt** and ensure bolt enters from **rear of chair back**, place another **washer** on short bolt then fully tighten with lock nut. Set aside.

Note: Thunderbird style chair will only use 3 short bolts, washers and lock nuts.

Step 2.

Locate 2 chair legs and 1 crossmember. Put plastic end cap into each leg. Place crossmember into curved end of each leg.

Step 3.

Attach the seat/back to the arms. Starting with the back, place **washer** on **long bolt** and align with mounting hole of chair back. Push bolt through hole placing plastic spacer between frame and chair back. Fully push long bolt through and secure with washer and lock nut. **DO NOT FULLY TIGHTEN**. Do the same on the other side and for the chair seat. Once you get to the last long bolt on the seat, it is normal to have quite a distance between the frame and the seat. This tension is what keeps the crossmember in place. Ensure that crossmember has not pulled away from frame, then **TIGHTEN ALL BOLTS AND NUTS. DO NOT OVER TIGHTEN**
